

# Managing and Adapting Practice (MAP)

## AT A GLANCE

Users get access to three primary tools: PWEBS (research database), Practitioner Guides, and Clinical Dashboards (for measuring progress). Used collectively, users select, build, organize, and implement treatment based on the most up-to-date research and can personalize care by incorporating evidence of practice history and youth outcomes.

The toolkit disaggregates the components of successful evidence-based treatments and pairs them with decision making tools designed to meet the needs of providers, children, adolescents, and their families.

## WHO USES MAP?

The MAP toolkit can be used in a wide range of behavioral healthcare settings including:

- Public and private behavioral health organizations
- School systems
- Mental health treatment centers
- Hospitals and clinics
- Military support systems
- Child welfare

## INFORMATION RESOURCES

PracticeWise Evidence-Based Services (PWEBS) Database

- Expediate the selection of evidence-informed treatment with a searchable database of research summaries from clinical trials.

Practitioner Guides

- Easy to follow 'How-to guides' for before, during, and after treatment.

Clinical Dashboards

- Track progress and practices.

## OVERVIEW

The MAP system is designed to improve the quality, efficiency, and outcomes of children's mental health services by giving clinicians easy access to the most current scientific information and by providing user-friendly measurement information resources and clinical protocols. Using an online database, the system can suggest formal evidence-based programs or, alternatively, can provide detailed recommendations about discrete components of evidence-based treatments relevant to a specific youth's characteristics. Whether services are delivered through existing evidence-based programs or assembled from components, the MAP system also adds a unifying evaluation framework that tracks outcomes and practices on a graphical "dashboard."

## SOLUTIONS

PWEBS Database

Practice Guides

Clinical Dashboard

## BENEFITS

Improve the effectiveness, efficiency, quality, and outcomes of behavioral healthcare.

- Enhance communication, monitoring, and focus through a structured collaborative framework
- Improve therapist satisfaction and reduce burnout
- Address staff retention and turnover more effectively
- Reduce the overall, long-term expenses related to staff training and retention
- Increase the use of evidence-informed practices, tools, and resources
- Guide activity for various levels of care settings

# MAP Training Program Description and Pricing

## AVAILABLE TRAININGS AND PROGRAMS ▼

### ONLINE INFORMATION RESOURCES ONLY

The PracticeWise Evidence-Based Services (PWEBS) Database, Practitioner Guides, and Clinical Dashboard are available for subscription via the internet at [www.practicewise.com](http://www.practicewise.com). Clinicians and organizations may download and use these information resources at any time, consistent with the online terms of agreement.

### DIRECT SERVICES TRAINING SERIES

This training series teaches providers to use the MAP system to improve their direct care to clients. The program's primary aim is for professionals to develop proficiency in the selection, organization, and delivery of common practices used in evidence-based treatments. This series satisfies a prerequisite for the MAP Supervision and Consultation Training Series.

### SUPERVISION AND CONSULTATION TRAINING SERIES

This training series primary aims are for professionals to acquire proficiency in (a) developing direct service professionals using the MAP Direct Services curriculum, (b) improving the processes of direct service, and (c) delivering supervision and consultation services using the MAP system.
