

Modular Approach to Therapy for Children (MATCH-ADTC)

AT A GLANCE

Extensively tested in multiple clinical trials, this innovative system provides a wealth of well-organized resources that can be easily adapted for a diverse array of children and problems.

WHO USES MATCH-ADTC?

MATCH-ADTC is designed for providers and organizations that serve youth and families coping with anxiety, depression, trauma, or conduct problems.

USERS INCLUDE:

- Marriage and Family Therapists
- Professional Counselors
- Social Workers
- Psychologists
- Graduate-level Students & Educators
- Psychiatric Care Providers

SECTORS INCLUDE:

- Healthcare Centers
- Outpatient Mental Health Centers
- Community-Based Organizations
- Residential Programs
- Schools
- State and Federal Government

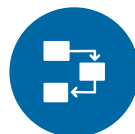

INFORMATION RESOURCES

- MATCH Protocol
- Online Learning
- Clinical Dashboards

OVERVIEW

MATCH-ADTC combines 33 procedures drawn from the most successful evidence-based treatments into a single, flexible system. Users start by selecting the primary clinical target area for treatment: anxiety, depression, trauma, or conduct. The MATCH-ADTC protocol then guides providers through well-organized resources to address the primary clinical target while deftly responding to a diverse array of therapeutic roadblocks, such as comorbid problems or unexpected life stressors.

SOLUTIONS

Step-by-step
Therapy Modules

Handouts &

Planning

BENEFITS

MATCH-ADTC allows providers to treat youth and families with comorbid concerns related to anxiety, depression, trauma, or conduct using a single, modular evidence-based program.

PROVIDERS

- Save time by streamlining care with a program that has proven success
- Eliminate guesswork when working with youth whose needs vary in complexity
- Trust that the treatment plans are evidence-based and have been rigorously tested

CHILDREN AND ADOLESCENTS

- Reduce duration of treatment
- Improve outcome and quality of care
- Increase for the future and a relief from their mental or behavioral problems
